IT-LOGIK
IT SERVICES

IT Services

UK-based IT company
providing IT support, cloud
& hosted services
for all types of business

More than 10 years providing IT services to UK businesses

Established in 2007, we are a London based IT company providing London IT support & services, and cloud & hosted services internationally. If you are a new business, or an established organisation, we provide a solution for all your business IT needs.

Above all, IT-Logik is founded on the premise that we know not every business is the same, providing a professional service, and a personal touch that revolves around your business, no matter how big or small.

Our support services extend to many types of industries, including accountancy, architecture, construction, retail.

- **IT support packages**
- **IT consultancy**
- **Backups & security**
- **Start-ups**
- **Hosted desktop**
- **Hosted Exchange**
- **Cloud VPS**
- **Office 365**

IT-LOGIK

IT SUPPORT AND SERVICES

We provide a number of IT support packages for any type or size company in the London area. We also provide IT consultancy services, and cover other important areas like backups & security.

Our services extend to hardware and software sales, as well as cabling & telecoms.

CLOUD & HOSTING

We offer a number of cloud and hosted services, from hosted desktops, hosted Exchange, email security, virtual private servers, cloud file storage, to online backups.

Everything is supplied via IT-Logik's core network, and directly supported by our in-house team of experts, cutting out the middle-man. We don't have to rely on third party companies to support our range of services.

ONGOING SUPPORT

Our core network, which includes our cloud & hosted services, is monitored 24/7 ensuring all systems are always up-to-date and available. This is done using the latest monitoring software such as Paessler PRTG & Solawinds N-Central.

We have a London-based service desk with a team of experts running an industry-standard ITIL service desk system, NetHelpDesk, which is also used by the NHS. Our team of experts can be contacted either by phone, email or online.
