

## Start-up

Assisting new business  
since 2007

### Start your new business the right way

There are many areas to consider when starting a new business, and making sure you have the very best IT infrastructure solution at the start should be on the priority list.

Furthermore, getting your IT setup correctly in the first place significantly reduces the risk of running into unexpected costs for your IT infrastructure down the line.

We can help scope your business IT requirements, and plan and deliver everything you need to be ready to go. In addition, we've a range of scalable support solutions to help you maintain and grow your business.

- **Experienced consultants**
- **Covering all areas of IT for any type of business**
- **Full-scope assistance from start to opening**
- **Providing cloud & hosted services**
- **Ongoing support**
- **UK-based service desk**
- **ITIL accredited**
- **More than 10 years experience**
